IMPORTANT

Prices in this book apply only to sizes and description listed; others must be made to order and will be billed accordingly. Ask for prices on special goods. When we find it advisable to make changes in designs and specifications, we reserve the right to make these changes without notice and without obligation to supply such items as they are herein illustrated and described.

RETURNED GOODS

Stock goods will be accepted only when returned within 60 days from date of shipment, in good condition, and providing return has been authorized by us in writing.

Credit will be allowed on same basis as charged less 10% to cover cost of extra handling and less return freight and package charges.

Odd millwork or stock items on which shop work has been done CANNOT be returned for credit. Please do not ask to return them.

GUARANTEE

All Andersen-Iroquois-Morgan woodwork comes to you with a guarantee of high quality, based on good material and workmanship. It must give the service for which it is intended providing a reasonable degree of co-operation is given by the dealer, contractor and consumer.

Unfinished woodwork of any kind should not be kept in damp storage whether it be a warehouse or a freshly plastered building. On the other hand, new millwork should not be subjected to abnormal heat. Finishing must be done properly and promptly and the top and bottom edges of doors MUST be well painted or varnished. Our responsibility ceases when any of these precautions are not heeded. Doors, being made of wood, and subject to varying atmospheric moisture conditions, naturally cannot be guaranteed against a slight spring or warp.

We will replace or repair (at our option) without charge, material which is defective within the meaning of this guarantee, but we do not agree to pay charges for finishing or installing replaced woodwork. Material can be replaced or repaired only with our consent.

Entrance Frame M-3—Door M-102

A Replica of an Eighteenth Century Entranceway Adapted to the Smaller Types of Colonial Home

A correct reproduction of an original discovered a few years ago in a small, quaint seventeenth century home in Albany, New York. This simple, graceful Broken Pediment design is admirably suited to the smaller types of Colonial where greater width is not desired. Pilasters of M-3 Entrance are convex and reeded through the center as shown.

M-3 ENTRANCE FRAME, PINE with OAK SILL includes: Rabbeted Jambs and Outside trim complete. Trim put together, Jambs (K-D) and Sill shipped separately. Chemically Treated.

DOOR SIZES	ROUGH OPENING	WIDTH OF BREAST	OVERALL OUTSIDE	2 x 4 STUD (5 1/4" WALL)	BR. VEN. (9 3/4" WALL)
3-0 x 6-8, 1 3/4"	3-3 1/4 x 6-11 1/2	4-4 1/2	5-1 x 9- 6 1/4	\$122.85	\$140.20
3-0 x 7-0, 1 3/4"	3-3 1/4 x 7- 3 1/2	4-4 1/2	5-1 x 9-10 1/4	122.85	140.20

Stud construction jambs are carried in stock for 5 1/4" wall. Brick veneer jambs for wall 9 3/4" or under are made in our shop. Outside trim sets on face of brick. Be sure to give wall dimension from face of brick outside to face of plaster inside.

DOOR not included, but described and priced in the door section.

Sam'l McIntire

In Colonial times Salem, Massachusetts, was the scene of a glorious flowering of the woodworker's craft. Favored by a most encouraging patronage the woodwork designers and carvers of Colonial Salem left behind splendid examples of their craftsmanship which today are reproduced faithfully in several of the beautiful designs shown in this book. Of these, the charming Doorway on this page is a typical example. It is said to be the work of Sam'l McIntire—the outstanding designer and woodcarver of his time.

Entrance Frame M-8—Door M-105

The "SAM'L MCINTIRE" DOORWAY A True Copy of Rare Beauty and Simplicity

A more fitting Entranceway for the plainer types of Colonial could hardly be wished for. Its simple, straightforward architecture will forever retain its appeal. The cap of this fine reproduction is beautifully detailed—the dentil treatment and graceful cap mould give it an air of refinement.

The original of this Entranceway is attributed to Sam'l McIntire, the famed eighteenth century woodcarver of Salem, Massachusetts.

M-8 ENTRANCE FRAME, PINE with OAK SILL includes: Rabbeted Jambs and Outside trim complete. Trim put together. Jambs (K-D) and Sill shipped separately. Chemically treated.

DOOR SIZE	ROUGH OPENING	WIDTH OF BREAST	OVERALL OUTSIDE	2 x 4 STUD (5/4" WALL)	BR. VEN. (9 3/4" WALL)
3-0 x 6-8, 1 3/4"	3-3 1/4 x 6-11 1/2	5-5 1/2	5-11 3/4 x 8-8 3/8	\$158.75	\$192.44

Stud construction jambs are carried in stock for 5/4" wall. Brick veneer jambs for wall 9 3/4" or under are made in our shop. Outside trim sets on face of brick. Be sure to give wall dimension from face of brick outside to face of plaster inside. DOOR not included, but described and priced in the door section.

HARDWOOD FLUSH EXTERIOR DOORS

VENEERED NATURAL BIRCH, AFRICAN MAHOGANY AND BROWN ASH

Our hardwood flush exterior doors are hollow-core construction with three-ply veneer faces either side and hardwood edge strips; lock blocks are properly positioned at left and right; doors cannot be cut down and should not be face grooved.

Light designs have hardwood drainage saddle mould and beads for glass. Glass is single strength bedded in putty both sides.

Doors with light design "L" are reversible; and each opening is 6" x 12". Each opening of design "X" is 24" x 7" with 3" space between.

POINTERS ON THE CARE OF DOORS

1. Have doors delivered to the job after the building and cellar walls are thoroughly dry.
2. Check jambs to be sure they are square and true.
3. Fit doors promptly. Iroquois-Morgan Doors have been properly seasoned and exterior designs are Woodlife treated.
4. Fit doors accurately. Allow about 3-16" for clearance and swelling in extremely damp weather.
5. Cut lock mortise carefully so as not to weaken the door.
6. Install three hinges and be sure that they are in true alignment and set flush with edge.
7. Paint or finish doors as soon as they are installed. Be sure that the top and bottom edges of doors receive two coats of paint or varnish and are kept painted.
8. Weatherstripping exterior doors helps to control inside temperature.
9. Use a combination door to protect against excessive sun and weather exposure.
10. Do not cut down doors from one size to another.
11. Lifetime satisfaction can be enjoyed by practicing good treatment in the beginning.

PINE FLUSH EXTERIOR DOORS

Solid Core— $\frac{1}{4}$ " Veneers—Plain Two Sides—Woodlife Treated

All lights are bedded in putty both sides, held with wood beads, and most designs have a special drainage saddle mould at the bottom of the light to prevent water from entering the core.

Doors with light designs cut off-center are reversible so that they may be hung either right or left. Center of the lights will be as near 5'-3" from the bottom of the door as the design permits, as this is considered average eye-level height.

These doors are not constructed to permit reducing in width or height.

QUALITY STOCK DOORS FROM DURABLE DOUGLAS FIR TREES

The giant Douglas fir, which grows only on the western slope of the Cascade mountains in Washington and Oregon, is one of the two strongest structural timbers known and the world's most valuable commercial tree.

Because of unusually favorable silvicultural conditions, including an abundance of rainfall, lack of severe winds, and rich soil, these trees are truly nature's giants, many of them larger than anything that has ever grown on earth.

Their very size, therefore, means that they are preponderantly heartwood and because there is such a small percentage of sapwood, Douglas fir is highly durable. Furthermore, according to government handbooks, Douglas fir heartwood is in itself one of the most durable species even under conditions favorable to decay.

Douglas fir doors are uniform in quality, being carefully manufactured according to the exact specifications contained in United States Commercial Standard. This standard also provides for grade marking for ready identification.

Physical characteristics of Douglas fir doors, other than their high durability, include unusual strength and stiffness, a surface hardness which is not easily marred, high screw-holding properties, and relative freedom from warping tendencies.

Durable, uniform in quality, readily available, styled to conform with architectural trends, easy to work and finish, Douglas fir stock doors meet every criterion of a quality, serviceable stock door item.

FLUSH INTERIOR DOORS

HARDWOOD VENEERS—HOLLOW CORE CONSTRUCTION

This line of interior doors has been expanded to include a kind of door for every class of housing; here are grades and woods in a large price range.

Hollow Core Doors have several points of superiority that commend them for use by the architect, builder and home owner. They fit well with almost every type of house and industrial design and lend themselves to almost every scheme of decoration. They are strong, light in weight and easy on the hinges. Initial finishing cost is materially less, as well as refinishing when required. They do not readily transmit sound, heat or cold; so that rooms are quieter and more even temperature is maintained. There are no mouldings or corners to catch dust, so cleaning or polishing is easy for the home keeper.

These points, together with beauty of grain, excellence of manufacture and a wide range of sizes and prices, should influence a decision in favor of Hollow Core Doors.

No. 1 GRADE, Natural Birch, African Mahogany and Brown Ash. The face veneers in this grade are matched, which gives an unusual pleasing symmetry. This grade is intended for the highest class of work and can be finished natural or with light stain to bring out the beauty of the matched veneers.

ECONOMY GRADE, Birch. The workmanship on this grade is every bit as good as the No. 1 grade, the only difference being that the veneers are not matched, yet are of the same high quality.

PAINT GRADE, Mixed Birch and Gum. Made in the same way as the other grades, but the kind of face veneers used keeps the price low. An excellent door for housing requiring a hard finish door for paint.

Lock blocks are properly located near either edge.

Doors are carried in stock 1 3/8" thick, as follows:

- No. 601—No. 1 grade, Veneered Natural Birch.
- No. 701—No. 1 grade, Veneered African Mahogany.
- No. 901—No. 1 grade, Veneered Brown Ash.
- No. 602—Economy grade, Veneered Birch.
- No. 802—Paint grade, Mixed Veneered Birch and Gum.

FLOATING ACTION DOOR HANGER

AN ENTIRELY NEW METHOD OF DOOR SUSPENSION

DOORS LITERALLY FLOAT IN AND OUT OF THEIR POCKETS!

Dorflo doors are suspended by a steel scissor mechanism which is noiseless, free working, and so rugged and simple that it is almost impossible to get out of order.

Finger-tip action — any child can operate it

No interference like this — no loss of space

No track top or bottom to stick and catch dirt

DORFLO HAS MANY FEATURES TO RECOMMEND IT

SAVES FLOOR SPACE—Swinging doors require floor space and wall space when folded back, Dorflo saves both spaces.

NO INTERFERENCE WITH OTHER DOORS—One of the big reasons for having Dorflo concealed installation.

NOT A SLIDING DOOR—There are no hangers above and no tracks below to catch dirt.

FINGER-TIP ACTION—So perfectly balanced that it moves at the slightest touch of a finger. A child can operate a Dorflo door.

DOOR SIZES—No. 5 accommodates doors 2-8 x 6-8 and smaller, No. 6 for doors up to 3-0 x 6-8, 1 3/8" or 1 3/4" thick. Double width installations also are possible.

SPLIT JAMBS—Provide a method of extending the door from the frame pocket, for easy adjustment of the hanger. Specify whether for 4 5/8" dry wall or 5 3/8" plastered wall.

SEMI-ASSEMBLED—The unit is supplied with the pocket put together, hardware applied to pocket, leaving only the framing of the rough opening and application of hardware to the door, and installing the jambs.

EASILY INSTALLED—Assembled unit, which is reversible, is easily placed in standard partition wall.

FRAMING SIZE—Opening in the partition must be two times the door width, plus 12 1/2"; and the door height, plus 3 1/4", from the sub-floor.

STOPS AND TRIM—Two sets of stops and regular door trim are required. Stops and trim are not included in the price.

FINGER PULL OR LOCK—These items are not included but are obtainable from your local hardware dealer.

DORFLO HARDWARE ONLY—No. 5, 2-0 to 2-8 wide, by 6-8 high and smaller, \$19.88
No. 6, 3-0 wide, up to 6-8 high, 21.06

FRAME POCKET—SEMI-SET-UP, WITH DORFLO HANGER APPLIED, Single No. 5, \$45.81; Single No. 6 \$ 48.06
Price of the door is not included. Double No. 5, 97.62; Double No. 6 102.12

SPLIT JAMBS—For doors up to 3-0 x 6-8 and for wall up to 5 3/8" thick, Ponderosa Pine, paper wrapped, \$10.20.

Be sure to specify size of door to be used and jamb width. Ask for price on 7-0 high equipment.

MIRROR DOORS

"EVALAST"

Guaranteed Mirrors, Electro Copper Plated Backs

The "EVALAST" Mechanical Silvering Process guarantees a hard, uniform, pure metallic silver-deposit, free from acid-forming destructive residue or sludge. The silver-deposit of "EVALAST" mirrors is reinforced by a protective copper metal back electrolytically bonded to the silver. The galvanic union of the silver and the copper metal hermetically seals and permanently preserves the silver-deposit against the elements and even against direct contact with water and steam. "EVALAST" processed mirrors are guaranteed against discoloring — spotting — streaking — clouding, etc., thus assuring permanently brilliant mirrors.

Uni-Rol

SWING-OVER-HEAD GARAGE DOOR

FEATURES

- Attractive appearance
- Out of weather when open
- Easily erected
- No fitting required
- Operates smoothly
- Used in new or old garages
- Bronze cylinder lock
- Locks at both Jambs
- Steel side weatherstrips
- Doors toxic treated

Two sections of doors are securely joined together with sturdy angle irons.

Weatherstrip and roller brackets applied with bolts and screws.

Metal door plate weatherstrip is applied to jambs.

THE "UNI-ROL" was designed, engineered, manufactured and introduced to satisfy a definite demand for a modern low-priced, overhead-type garage door. The usual high standard of construction has been retained; yet, the "UNI-ROL" is well within the popular price range. "UNI-ROL's" simplicity, sturdy construction and quiet, smooth action are a revelation in garage door operation.

Doors prefitted to 7'11 1/4" x 6'11"; minimum spaces required over the door opening size, headroom 1 5/8", at each side 2 1/2".

THE HARDWARE, especially designed for the "UNI-ROL" garage door, is made of japanned finish wrought steel. The roller brackets are constructed with BALL BEARING rollers for long life and quiet operation. A two-piece steel weatherstrip, notched with projecting lugs for proper spacing, is furnished for each side of the opening. Holes drilled in the weatherstrip locate the position of the operating hardware.

LOCKING DEVICE

Interior

Exterior

Tracks are supported at rear with pre-drilled metal straps.

Self-locating operating hardware is applied to the jambs.

Perfect balance obtained by simply adjusting spring tension.

Sectional FARLO-ROL

TRADE MARK

FOUR SECTION OVERHEAD GARAGE DOOR

COMPLETE WITH ROLL-UP HARDWARE

Attractive, easy to open and close, the FARLO-ROL is just what today's builders are asking for.

The FARLO-ROL is a 4 sectional garage door—rolls "up and over" out of the way. Eliminates all danger of damage to car or door when backing out or driving in.

No. 816 — \$95.50
4 Lights Glazed SS and 12 Flat Panels.
Pre-fitted for opening 8'0" x 7'0".

PERFORMS PERFECTLY UNDER ALL WEATHER CONDITIONS

Not affected by weather conditions. The sturdy weather tight construction of FARLO-ROL makes it impossible for rain, snow, sleet, ice, or dirt to filter in. All hardware is installed inside the garage—protected from the weather and from damage.

Neat and compact, the FARLO-ROL is a prefit garage door, an important feature that not only simplifies installations, but greatly reduces the installation cost. Recommended for new construction as well as on remodeling work.

DOOR CONSTRUCTION

The FARLO-ROL is made in 4 sections with $1\frac{3}{8}$ " thick W.P. Pine stiles and rails of substantial width, assembled with giant dowels. Panels are 3-ply laminated. Sections are trimmed to exact size and rabbeted together. NO FITTING NECESSARY. The entire door is Toxic Treated (Rot-proofed) after assembling.

HARDWARE

Hardware is a roll-up type with two tension spring balancing units. Door hardware is heavy wrought steel with the exception of the rollers which are of special material to give quiet and longer lasting service. Metal ceiling strap hangers are furnished for suspending horizontal track. Equipped with a two-way locking device with bronze rim cylinder and all necessary screws and bolts to complete the installation.

Left — Operating stresses are transmitted to the hardware and not to the door or structure.

Right — Equipped with two-way locking device, enabling the door to be locked from the inside without key.

Headroom — $9\frac{1}{2}$ " minimum clearance above door must be maintained for a depth of $9'1\frac{3}{4}$ ". Side room 4" minimum; 8" required for mullions.

EASY TO INSTALL

Complete illustrated instructions for installation included with each set of hardware.

Left — Extra long wrought steel hinges reinforce joints between stiles and rails.

BLINDS AND SHUTTERS

PINE—1 1/8" THICK—IN PAIRS—NOT RABBETED OR BEADED

TREATED WITH "WOODLIFE" TOXIC AND WATER REPELLENT

Blinds and Shutters give the home a look of Architectural Completeness.

They are as necessary to the correct exterior treatment of the house as a well-designed Entrance. Without them the home is usually severe looking and lacks the necessary finished appearance.

Iroquois Blinds and Shutters are architecturally correct and strongly constructed. Treating with "Woodlife" together with proper painting protects them from the attacks of the elements.

Wood is the oldest and most natural building material known to man. It lends itself to the most beautiful

design. If kept sound—by protection against moisture and fungi—it will last through the ages.

The chart above tells the story—first, how "WOODLIFE" preserves wood against conditions; second, how the benefits of wood preservation are real insurance for the dealer and builder; third, how consumer satisfaction more than justifies the small additional expense for treating.

For 3-minute submersion treatment in "WOODLIFE" water repellent and toxic, the extra charges are:

Window Frames	\$0.30 each
Door Frames	.45 each
*House Doors	.60 each
Combination Doors	.75 each

*These extras do not apply to stock Pine Exterior Doors, which are "Woodlife" treated at no additional cost. "WOODLIFE" treatment is colorless, is the equivalent of a priming coat, and is an aid to any type of finish. After fitting or trimming, a brush coat should be applied over the new surface.

"WOODLIFE" water repellent and toxic for use on the job, is sold in the following containers:

One quart cans	at \$1.44 per quart
Case of 12 one-quart cans	at 1.31 per quart
One gallon cans	at 3.84 per gallon
Case of 6 one-gallon cans	at 3.48 per gallon
55-gallon drums	at 1.88 per gallon

FRAME FEATURES PROVIDE FOR WALLS OF VARYING THICKNESS AND DIFFERENT TYPES OF CONSTRUCTION

Among the many features of Frame No. 612, is the two-piece wide blind stop, which makes this frame usable with either 1/2" or 3/4" sheathing; also, the reversible inside jamb liner, which can be placed in any of three positions or omitted. Other features are locked sill-joint, chamfered blind stops, supporting jamb lugs under sill, insulated mullion center and chemical treatment.

Stud opening, over window size, 3" in width, 3 5/8" in height; mullion center 2 3/4". Wide blind stop requires that the sheathing be set back 1 1/2" at head and each side.

Masonry opening, over window size, 4" in width, 4 5/8" in height.

SASH BALANCES

UNIQUE

The Unique Balance is a compact, self-contained mechanical device for balancing double-hung windows. The mechanical operation employs a coiled oil-tempered spring, a spiral rod and a bushing; all are enclosed in a rigid metal tubing which is the only exposed part.

GRAND RAPIDS

Fits into the side stiles with the entire Balance moving with the sash. The Balance itself is always invisible. Approximately 1" of the brass bearing arm shows when the window is closed.

PRICES FOR EITHER MAKE

SET OF 4, including 5-6 high	\$3.00
SET OF 4, 5-10 high	3.20

BE SURE TO SPECIFY OPENING HEIGHT AND KIND OF BALANCES ON EACH ORDER

IROQUOIS "CLEAR-VIEW" PICTURE WINDOW UNIT SET-UP, WITH END WINDOWS

TRIPLE "CLEAR-VIEW" PICTURE WINDOW UNIT WITH INSULATED GLASS CENTER AND DOUBLE-HUNG END WINDOWS

This series is a combination of a large center opening of insulated glass and two double-hung end windows. The drawings below show how these combinations look for size and design. There are three widths of insulated glass, one size of windows of four designs and two frame designs, all based on a window opening height of 4-6. The unit comes completely set-up with balances and weatherstrips installed and is Wood-life treated.

Unit numbers preceded by the letter "P" are plain casing frames to match No. 512; unit numbers pre-

ceded by the letter "M" are moulded casing frames with wide blind stop to match No. 513. Be sure to specify "P" or "M", together with unit number and window design.

Insulated glass may be either Libbey-Owens-Ford THERMOPANE or Pittsburgh TWINDOW, our option, consisting of two lights of $\frac{1}{4}$ " clear plate glass with a $\frac{1}{2}$ " dehydrated air space between them, set directly into the frame opening with elastic glazing compound and held with wood stops. Glass in the windows is bedded in putty.

At time of assembly, Screens or Storm Sash for the end windows fitted and numbered only 90c each. Screens and Storm Sash will be found elsewhere in this catalog.

Moulded casing units require that the sheathing be set back 1 $\frac{1}{4}$ " at the head and each side to accommodate the wide blind stop. Masonry openings for "M" units are 1" wider and $\frac{7}{8}$ " higher than stud openings.

Picture units cannot be shipped by common carrier on account of liability of damage.

SET-UP UNITS CANNOT BE RETURNED FOR CREDIT

IROQUOIS "CLEAR-VIEW" PICTURE WINDOW UNIT SET-UP, WITH END WINDOWS

TRIPLE "CLEAR-VIEW" PICTURE WINDOW UNIT WITH STATIONARY SASH CENTER AND DOUBLE-HUNG END WINDOWS

This page offers triple units with a variety of single sash centers and double-hung end windows. The range of sizes, design of windows and different kinds of glass make this an economical unit. The unit comes set-up with balances and weatherstrips applied, Wood-life treatment and glass bedded in putty.

Regardless of the drawings below, choice of window design can be had with any center sash. Be sure to specify "P" for plain casing or "M" for moulded casing frame, unit number with letter and design of window.

The following notes apply to both series of units on this page. Moulded casing units require that the sheathing be set back 1 1/2" at the head and each side to accommodate the wide blind stop. Masonry openings for "M" casing units are 1" wider and 1/8" higher than stud openings.

PICTURE UNITS CANNOT BE SHIPPED BY COMMON CARRIER. SET-UP UNITS CANNOT BE RETURNED FOR CREDIT

IROQUOIS SINGLE "CLEAR-VIEW" PICTURE UNIT—SET-UP

Unit numbers preceded by the letter "P" are Plain Casing frames to match No. 512; unit numbers preceded by the letter "M" are Moulded Casing frames to match No. 513.

Frames are "Woodlife" treated. Shipment cannot be made by common carrier on account of liability of damage.

SET-UP UNITS CANNOT BE RETURNED FOR CREDIT

Single "Clear-View" units are set-up with insulated glass one inch thick set directly into the frame with elastic glazing compound. Insulated glass may be either Libbey-Owens-Ford THERMOPANE or Pittsburgh TWINDOW, our option, consisting of two lights of 1/4" clear plate glass with a 1/2" dehydrated air space between them.

Andersen CASEMENT UNIT

THIS IS A COMPLETE ANDERSEN WOOD CASEMENT UNIT ASSEMBLED—READY TO INSTALL IN YOUR HOME

1. Reinforced glued mitre joint eliminates exposed end wood.
2. Section through double glazing panel showing weatherstripping seal. The double glazing cuts radiation heat loss 60%.
3. Special design of sash eliminates sticking and binding. Glazed A quality glass, bedded in putty.
4. Weatherstrip attached to sash bottom rail makes tight seal at sill.
5. Vents for space between double glazing and sash help control condensation and frosting.
6. Frame sill has Andersen Master leakproof construction with lock sill joints and weather-tight windbreak.
7. Bronze underscreen sash operator opens window easily and quickly. Holds sash in any open position.
8. Extension hinges swing sash out so that outside of glass can be washed from the inside.
9. Spring tension weatherstripping comes attached to frame at head and sides.
10. Popular flat type inside screen. Comes with fasteners attached. Light weight, attractive and durable.
11. Sash lock pulls sash completely shut, then locks it. Also ejects it for easy opening. Independent of screen.

LEAKPROOF, WEATHERTIGHT, SUPERIOR IN CONSTRUCTION

In the above picture you see all of the parts assembled into a complete casement unit.

When you buy Andersen Wood Casements for your home, your worries about windows are over, for this unit is complete, all ready to install. Each unit includes frame, sash, glass, weatherstrip, sash lock, sash operator, inside screen and inside double glazing (optional equipment).

Architects recognize the Andersen Wood Casement as one of the most weathertight windows on the market today. In tests made on an average residential casement (not weatherstripped), by the American Society of Heating and Ventilating Engineers, it was shown that air infiltration per foot of sash perimeter

in a 10 mile an hour wind was thirty-two cubic feet per hour. With an Andersen Casement Window (weatherstripped) under the same conditions this air infiltration was cut to only two and one-half cubic feet per hour.

The Andersen Casement has also been proved leak-proof under extreme rain conditions. In a Rain Storm Machine a wind of gale proportions (45 miles per hour) was produced, accompanied by a rainfall equivalent to 1 inch in 15 minutes. This torrent was turned on to a Casement Unit for periods of fifteen minutes at a time. Under these extreme conditions not one drop of water came through the joints between sash and frame, either during the driving rain or afterwards.

Andersen CASEMENT UNIT

OUTSWINGING CASEMENT UNIT ANSWERS EVERY REQUIREMENT

The Andersen Casement Unit is an improved casement window that successfully combines the advantages of weathertight wood construction with the beauty of contemporary narrow line design.

Effective weatherstripping, double glazing, and leakproof frame construction provide exceptional window insulation. This engineered window is convenient and easy to operate, exceedingly weathertight, simple in construction and easy to install, well proportioned and unusually attractive in appearance.

THE COMPLETE UNIT INCLUDES:

FRAME • INSIDE STOPS • MULLION CASINGS • GLAZED SASH • WEATHERSTRIPPING • COMPLETE HARDWARE AND INSIDE SCREEN FOR VENTILATING SASH • DOUBLE GLAZING • EXTENSION JAMBS • SETTING-UP.

Section through jamb at left shows location of compression weatherstrip, removable double glazing on inside of sash, and inside screen. Frame and sash are made of selected clear Western Pine treated with Andersen Chemical Preservative and water repellent in accordance with highest industry standards.

ENGINEERED FOR EFFICIENT SERVICE

Note the special outswinging sash construction with two point "refrigerator door" contacts and a full $\frac{1}{8}$ " clearance between sash and frame. Sash cannot stick or bind. They remain true and square because of extra thickness, a full 2", and strongly reinforced corner joints. Tightness is insured by compression weatherstrips, yet sash always operate freely and easily. The ejecting sash lock releases the sash from weatherstrip contacts and will easily break paint bind. When closed it holds sash tightly shut and insures full weatherstrip contacts. Works independently of screen.

Extension hinges permit easy washing of outside glass from the inside. Roto-gear under-screen sash operator adjusts and automatically holds sash in any open position. Inside screen furnished with fasteners attached. Double glazing panel (storm sash) has aluminum frame and metal weatherstrip seal.

Cam and lever ejecting sash lock. Bronze handle. Statuary bronze finish.

Roto-gear underscreen sash operator. Bronze handle and case, statuary finish.

Scale—Three Inches Equal One Foot.

Installation note—be SURE to set the sheathing back $\frac{1}{8}$ " at head and each side and $\frac{1}{4}$ " at sill, to accommodate the windbreak.

Installation of standard unit in frame wall. Note reversible windbreaks for either $\frac{3}{4}$ or $\frac{1}{2}$ inch sheathing. Plaster reveal inside finish can be used in place of extension jambs and casing trim. The same standard unit is used in all types of wall construction. Additional installation details furnished on request. Trim members should be ordered separately to conform to individual requirements.

Andersen CASEMENT UNIT

ONE LIGHT SASH, DSA BEDDED, SET-UP

Andersen Casement Units are priced according to a suggested method of swinging (/) the sash, viewed from the outside.

COMPLETE UNIT prices are figured according to this method, and include Hardware, Screen for each swinging sash, Double Glazings for all sash and Extension Jambs for 5 1/4" wall. For variations from this method, see the bottom of this page.

CORNER WINDOW DETAIL
Scale $1\frac{1}{2}" = 1'-0"$

Angle iron or steel column can be used in place of 4x4. Sash may be either swinging or stationary.

Long sill horns (10") can be supplied on any unit up to and including 9-8 $\frac{3}{4}$ sash opening at 78c extra. Chrome finish hardware, instead of Bronze, add for 2 or 3 lights high, \$4.63 extra for 4 or 5 lights high, 5.88 extra

Our guarantee of satisfactory operation of Andersen Casement Units can only be maintained by setting-up the units in our own shop; therefore, please do not ask us to furnish in knocked-down form.

A "Maintenance Manual" is supplied with Casement Units, with suggestions for the better care and operation of these units. Each owner should have one, write us if you did not get your copy.

ANGLE BAY DETAIL
Scale $1\frac{1}{2}" = 1'-0"$

Section through angle mullion made from standard units. Specify long sill horn for mitering. Exterior casings are extra.

Andersen GLIDING UNIT

FOR MODERN WINDOWALLS

The Andersen Gliding Unit was first introduced in 1940 and has since been successfully used on thousands of installations in all parts of the country. Its horizontal sliding action permits larger sizes than are practical in other types of ventilating windows that operate vertically or swing on hinges. Attractive design, easy installation, simple operation, weather-tightness, adequate window insulation and wide opening sizes are some of the superior features that make this modern residential window the ideal WINDOWALL.

The schedule of stock sizes and layouts has been changed and further standardized to meet modular construction requirements and to include one light glazing. The frame has been redesigned with heavier jambs and narrower overall jamb width for greater installation flexibility. Certain mechanical improvements have also been made including more efficient weatherstripping and a new KYS-ITE plastic sill track.

THE COMPLETE UNIT INCLUDES:

- Frame—New design, requires no separate inside stops and includes head track routed in head jamb.
- Sash—1½" thick, grade A glass, bedded in putty, hardware installed.
- Weatherstripping—Andersen Silver Seal, completely installed.
- Screen—(optional).
- Removable Double Glazing—(optional).
- Complete Hardware and Operating Equipment

All wood parts treated with Andersen chemical preservative and water repellent.

SUPERIOR OPERATING SIMPLICITY

Closed: the sash are in line in the same plane like a casement window. Open: the right hand sash glides into an inner track so that the sash can pass each other. Sash are instantly removable without tools. Removable double glazing panels are fastened on outside face of sash. Easily removed for cleaning inside the room. Operating equipment is simple, positive, dependable.

Sash Opens Like This

Sash Comes Out Like This

Double Glazing Easily Removed

IMPROVEMENT PROVIDES FOR TRIPLE GLAZING

A regular stock double glazing now can be inserted on the inside of the screen to provide triple glazing. The screen has been changed by applying the wire on the outside and rabbeted inside to receive the double glazing.

A combination porch-living room Windowalled with Andersen Gliding Units.

Andersen GLIDING UNIT

MODULAR SIZES

Sizes conform to the modular standards for masonry openings and glass lights are cut accordingly in order to maintain the 4 inch module. Masonry openings shown on the table of sizes are exact overall unit dimensions. Widths are measured from back of brick mouldings and heights from top of brick moulding to bottom edge of sill. The masonry opening height dimensions are less than the modular opening to allow for the lintel and the slope of the masonry sill.

Sash are made with horizontal lights glazed SSA and single lights glazed DSA. Special sizes and layouts cannot be furnished.

MULTIPLE OPENINGS

All openings shown are single units having two sash that slide past each other and are in the same plane when closed.

Multiple openings are formed by joining single units with side casings back to back and sill horns butt jointed to form 4 inch modular mullions. To arrive at overall masonry opening width for multiple openings using 4 inch modular mullions, add masonry opening widths shown for single units. For rough stud opening deduct $\frac{3}{4}$ inch from overall masonry opening.

ADAPTATION DETAILS

SCALE $1\frac{1}{2}'' = 1'0''$

STANDARD MULLION

Detail shows 4 inch mullion made by placing two standard single units together with sill horns butt jointed and regular casings back to back.

NARROW MULLION

Where a load bearing support is not required, single units can be joined to form a 2 inch mullion as shown above.

CORNER

Detail shows corner construction with standard two inch sill horns and casing. Long sill horns can be furnished for special corner casings.

ANGLE BAY

Detail shows 45° angle bay mullion using standard units with long sill horns. Special outside casings are extra.

EXTRA FOR LONG SILL HORNS 78c

SCALE $3'' = 1'0''$

Standard unit in frame wall with lath and plaster inside finish and $\frac{3}{4}''$ sheathing. The extension blind stop can be rabbeted for $\frac{1}{2}''$ sheathing and this should be specified when ordering the unit.

Installation note—be SURE to set the sheathing back $1\frac{1}{8}''$ at head, $1\frac{7}{8}''$ at each side and $1\frac{3}{8}''$ at the sill, to accommodate the wide blind stop.

Andersen GLIDING UNIT

ONE LIGHT SASH, DSA BEDDED, SET-UP

COMPLETE UNIT prices include Frame put together, plastic sill covered with masking tape, Gliding Sash, Screens not installed, Double Glazings and Extension Jambs for 5/4" wall.

Andersen PRESSURE-SEAL

DOUBLE-HUNG WINDOW UNIT

APPEALS TO CONTRACTORS AND HOME OWNERS

The Andersen Pressure-Seal Double-Hung Window Unit is a new streamlined, complete double hung unit designed specifically for the requirements of present-day housing construction. It offers exceptional value to contractors and builders because of its completeness, extreme simplicity, ease of installation and adaptability to all types of construction. Weathertightness, easy operation and removable sash are features that have a special appeal, particularly to home owners.

WEATHERTIGHTNESS

Pressure strips attached to the sash stiles force the sash tightly against the parting stop and close the crack around the sash perimeter so that no weatherstripping of the conventional type is required at the sides. Laboratory tests and actual experience on hundreds of jobs have proved this method to be fully as effective as the best metal weatherstripping. It has the added advantage of complete freedom from weatherstripping friction or "drag" when the pressure is released by the operating mechanism.

SUPERIOR FEATURES

You've never seen a double hung window so easy to operate!

When the thumb levers are depressed, the sash float freely in the sash runs. There is no friction against weatherstrips or painted surfaces to make sash stubborn and difficult to move. They can be raised or lowered to any position quickly and with almost no effort.

Cleaning's Easy Because the Sash are Removable!

Just lift out the sash. No tools needed—and it takes only seconds. Sash are not hung on weights and chains or connected to springs or balances. Just lift up and pull out. With sash out, screens and storm sash can be changed from the inside.

REMEMBER — YOU SAVE ON INTERIOR TRIM!

The stool is furnished, returned on both ends—the stops are included, already attached to the frame—over one third of the trim cost is saved in material and labor on these two items.

WEDGE-LIKE ACTION

Lever Down—
PRESSURE OFF

Lever Up—
PRESSURE ON

QUICK AND EASY INSTALLATION REDUCES FINAL COST

Nail Frame in Rough Opening

Slip Sash Into Place

The frame is set in rough opening and held in place by nailing wide blind stop to studs. A weathertight wall joint is assured.

The sash come complete with pressure strips, weatherstripping and operating mechanism installed. They are all ready to be slipped in place from the inside. There are no weights to hang or other counterbalancing devices to install.

The standard frame detail can be used in any type of wall. The moulded inside stop on the side jamb greatly simplifies trimming out. A special fitted stool is included and only a simple inside casing or band moulding is required to complete the job.

Andersen PRESSURE-SEAL DOUBLE-HUNG WINDOW UNIT

INSTALLATION DETAILS

Details show installation in standard frame wall with reversible wide blind stop in proper position for $\frac{3}{4}$ " sheathing. Position is reversed for $\frac{1}{2}$ " sheathing. Installation is the same in brick veneer wall with blind stop flush with sheathing.

Standard left and right hand jambs are furnished for mullion posts. The deep sash run in right hand jamb is required for sash removal. Note how moulded inside stops form a mullion casing. Regular casing can be added if desired.

THE COMPLETE UNIT INCLUDES:

Frame—Special leakproof construction with reversible wide blind stop, and under-sill windbreak. Also includes combination inside stop and trim member.

Sash— $1\frac{1}{2}$ " thick SSB glass bedded and glazed with elastic glazing compound.

Pressure Strips—Aluminum, installed in sash at factory.

Weatherstrips—Check and bottom rail strips attached to sash.

Operating Mechanism—Installed in sash at factory.

Stool—Clear Pine, $2\frac{1}{4}$ " width only.

Exposed wood parts treated with Andersen Chemical Preservative and Water Repellent Solution.

SCALE—3" = 1'0"

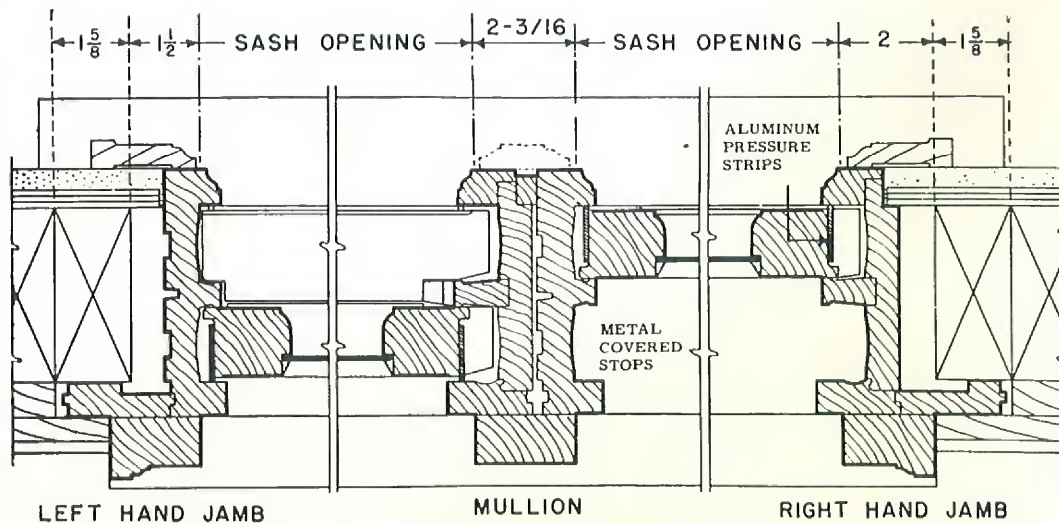

SCALE— $1\frac{1}{2}$ " = 1'0"

Installation in dry wall construction with $\frac{1}{2}$ inch sheetrock inside wall finish. Note position of windbreaks and the $\frac{1}{4}$ inch thick shim under windbreak to make correct jamb width for $\frac{1}{2}$ inch sheetrock. Conventional trim may be used with this type of installation.

NOTICE TO BUILDERS

Sheathing should be applied before frames are installed. Be sure to allow for the extension blind stop as indicated on Installation Details.

Andersen PRESSURE-SEAL DOUBLE-HUNG WINDOW UNIT

TYPE 22, GLAZED BEDDED, SET-UP

Unit consists of moulded casing frame with reversible blind stop, fitted window with weatherstrips and operating mechanism, inside stops and stool. Completely assembled, ready to be placed in any type wall.

A "Maintenance Manual" is supplied with suggestions for the better care and operation of Pressure-Seal units. Each owner should have one. Write us if you did not get your copy.

INSTALLATION INSTRUCTIONS!

Andersen Pressure-Seal Units are fabricated with frame and sash completely manufactured and all parts precision fitted. Operating mechanism and weatherstripping are installed at the factory.

Installation in the building is comparatively simple, but it is important that builders realize that different

techniques and methods are required than for site-assembled frames and windows.

Builders can save themselves a lot of time and trouble by carefully observing the suggested methods for installing the frames and windows as outlined in the instruction sheet furnished with each job.

Andersen PRESSURE-SEAL DOUBLE-HUNG WINDOW UNIT

PROTECTION DURING CONSTRUCTION!

Frames should be primed and kept out of the opening until the sheathing is applied and the roof is on. Allow for wide blind stops when applying sheathing. Leave the braces in place.

During rough construction and plastering, remove the

sash and store them where they will be clean and dry until after the trim has been installed.

When necessary to close the openings during the period of rough construction and plastering storm sash should be used, or screens covered with muslin, or plastic glass material tacked on.

COMPLETE UNIT, center $\frac{1}{4}$ " plate	154.58	165.67	177.90		

This series of Pressure-Seal picture units can be supplied with either the left or right (from outside) window omitted and the width members long for corner installation. Deduct \$23.42 for window 4-2 high, \$24.09 for window 4-6 high, \$25.61 for window 5-2 high. On order, specify complete number and indicate which window is to be omitted.

At time of assembly, Screens or Storm Sash fitted and numbered only, 90c each. Screens and Storm Sash will be found elsewhere in this catalog.

A "Maintenance Manual" is supplied with suggestions for the better care and operation of Pressure-Seal units. Each owner should have one. Write us if you did not get your copy.

PAINTING POINTERS!

The sash should be painted out of the opening; making sure to keep the paint off of the pressure strips, operating mechanism and weatherstripping. Let dry before installing.

To avoid paint bind and insure easy sash operation, paint should be applied sparingly to the sash runs and points of contact on the sash. Do not use heavy

enamels at these points and remove any accumulation of paint. Do not wax the sash runs.

Protect the putty with one or more coats of paint before exposure to the weather. The paint should be lapped slightly on the glass to form a tight seal. Be careful not to break this seal when cleaning the glass, especially when scraping with a razor blade.

Andersen PRESSURE-SEAL PICTURE UNIT

TYPE 100, SET-UP

This unit consists of a Frame put together, with stationary Sash installed, glazed one light insulated glass or 1/4" plate glass, in the same sizes as the center of the Pressure-Seal picture unit. Other sizes are not available.

Andersen BASEMENT—UTILITY UNIT

FOR BASEMENTS—SUMMER CABINS—SERVICE BUILDINGS AND OTHER SIMILAR USES

THE COMPLETE UNIT INCLUDES: Frame, Glazed Sash, Weatherstrip, Screen, Hardware, Water-repellent Treatment, Factory assembly, Carton packing, Glass storm panel (when ordered).

VACATION COTTAGES AND CABINS

Sizes have been standardized to fit typical 16 x 8 inch block walls for masonry openings 2 blocks wide by 2, 2½ and 3 blocks high.

SERVICE BUILDINGS AND GARAGES

Unit No.	Unit	Storm Panel (Extra)
2813	\$10.83	\$2.89
2817	11.76	3.29
2820	12.65	3.68

REVERSIBLE SASH

New dual purpose hinges permit swinging the sash from either top or bottom. Hinge members for both positions are attached and sash can be instantly reversed or removed without tools.

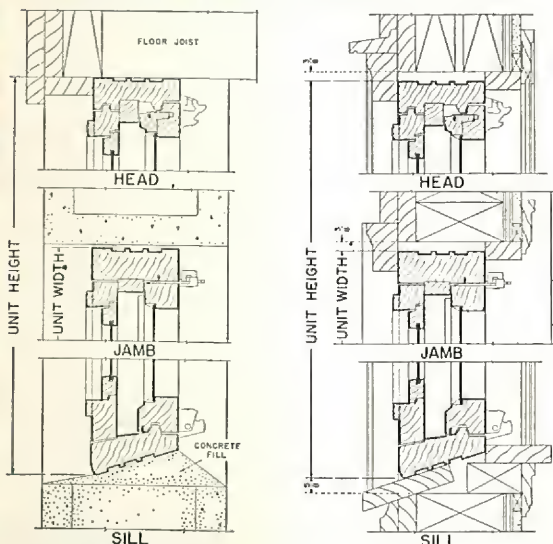

A practical and widely used factory assembled wood basement window that successfully combines the weathertight and insulating advantages of wood windows with the large glass areas and quick installation of metal basement windows.

Also used as a general utility window in dormitories, service buildings, summer cabins, farm buildings, garages and other similar structures. Comes as a complete, factory assembled unit with frame set-up, sash glazed and hung, screen fitted, and installed and all hardware applied, Packed two in a carton.

NEW STORM PANEL

The screen now furnished is rabbeted to receive a glass storm panel which takes the place of the former storm sash. This storm panel comes with fasteners attached, ready to slip in place on the inside of the screen. Supplied extra when ordered.

INSTALLATION DETAILS, SCALE 1½" = 1'0"

Typical installation in concrete block wall with poured concrete sill. Suggested installation in frame wall with lath and plaster inside finish.

MULLION formed by placing units end to end to form ribbon windows.

TRANSOM formed by stacking one unit above another. Note how front edge of head jamb is beveled.

For above ground use the Basement-Utility Unit can be installed in a number of different ways, either singly or joined vertically or horizontally, using auxiliary casings, drip cap and extension jambs.

Detail at left shows a suggestion for a watertight installation in a typical frame wall with lath and plaster inside. Auxiliary items are extra.

GLAZED CHECK RAIL WINDOWS—PINE

PREFITTED and TOXIC TREATED

Windows on this page are 1 3/8" check rail, ploughed for balances at no extra.

FOR CASEMENT SASH IN PAIRS

Double the price of singles shown above and add 50c for rabbeting the meeting stiles.

For rabbeting the bottom rails of inswinging sash, add 60c.

For meeting stiles beaded, add 50c.

BE SURE TO SPECIFY WHETHER PAIRS OF SASH ARE TO SWING IN OR SWING OUT
RABBETED CASEMENT SASH CANNOT BE RETURNED FOR CREDIT

HALF WINDOWS

Use 60% of the price of a two light window and add 36c for each divided light.

Half windows CANNOT be returned for credit.

OBSCURER GLASS

Add 45c per square foot of glass area to the price of glazed SS of the same size. Figure even inches in determining square footage.

IROQUOIS CHECK-RAIL WINDOWS ARE NOW SUPPLIED PLOUGHED FOR
UNIQUE, GRAND RAPIDS OR SIMILAR SPIRAL BALANCES AT NO EXTRA COST.

EXTRAS

APPLYING TO ALL LINEAL MOULDINGS

FOR LESS THAN 200 LINEAL FEET OF A PATTERN, ADD	5%
FOR PAPER WRAPPING, ADD	5%
FOR CASINGS SPECIFIED 7-0 OR 14-0 LONG, ADD	10%
FOR CASINGS SPECIFIED OTHER LENGTHS, ADD	5%
FOR OTHER PATTERNS IN SPECIFIED LENGTHS, ADD	5%

Compute specified lengths as follows:

Lengths under 6-0, to next half foot; example 4-1 as 4-6, 4-6 as 4-6, 4-7 as 5-0.

Lengths 6-0 and over, to next foot; example 8-1 as 9-0, 9-0 as 9-0, 9-1 as 10-0.

Specified lengths are subject to availability and cannot be returned for credit.

IROQUOIS PACKAGE TRIM

IROQUOIS TRIM patterns are produced on our own machines, so we can control the uniformity of our design contours. IROQUOIS PACKAGE TRIM is wrapped in our plants, so we know that the stock is of the highest quality and clean and bright.

Dealers can order Iroquois Package Trim for their stock with the assurance that it will be satisfactory when delivered to the job. Packages securely wrapped in heavy Kraft paper guarantee this protection.

Four selected styles of Iroquois Trim packaged for stock in units are priced in the trim section of this catalog. However, we can supply trim packed in other manners, as listed below.

EXTRAS FOR ASSEMBLING IN UNITS AND PAPER WRAPPING

	Per Package		Per Package
Single Window Width, 1 in a Package.....	\$0.36	Single Window Height, 1 in a Package.....	\$0.27

Four sides of Door Trim and two sets of door stops, in a Package.....			.54

EXTRAS FOR MACHINING PARTS OF TRIM

The facilities of our woodworking shop enable us to perform certain operations on interior trim which can be done much more economically than at the job.

Jambs jointed down in width.....	\$0.40 per set	Apron returned	\$0.30
Casings mitered only15 per side	Stool returned30
Casings mitered and kerfed		Per hundred	
with clamp nails supplied.....	.36 per side	Clamp Nails only.....	\$3.00

MITER CLAMP AND SPLINE DRIVER LOANED TO CUSTOMERS

On house jobs where a quantity of mitered and splined trim is used, we suggest using our special miter clamp and driver. These tools make for perfect miter joints with the least labor.

In order that our records may be kept properly, we charge for this equipment, but full credit is given on return in good condition.

INTERIOR TRIM FOR UNITS

ALL OF THE TRIM STYLES ARE ILLUSTRATED AND DESCRIBED ON PAGES 104 TO 112.

PONDEROSA PINE

ANDERSEN CASEMENT UNIT TRIM

For Casement Units on pages 64 thru 66,

For single Picture Sash Units on page 67,

For multiple Picture Units on pages 68 thru 73.

In the table below, select price corresponding to sash openings of width and height wanted.

STYLES "G," "O," "V," "X"

Sash Opening Heights	2-2	2-8 $\frac{3}{8}$	3-2 $\frac{3}{8}$	4-2 $\frac{3}{8}$	5-2 $\frac{3}{8}$
Sash Opening Widths					
1-6	\$1.74	\$1.87	\$2.00	\$2.27	\$2.55

M-856

The CORNWALL HOUSE STAIRWAY—Connecticut

An eighteenth century Stairway of rare charm. A graceful Colonial adaptation well suited to present-day homes of traditional architecture.

The suggested Starting Section shown above includes:

M-779V Starting Step—M-765 Starting Newel—M-722 Volute—M-720 Rail ($2\frac{1}{4}'' \times 2\frac{3}{8}''$)—M-892 Balusters.

(ALTERNATE—M-780 Starting Step—M-895 Starting Newel—M-719 Volute)

Your stair builder will tell you exactly what Morgan stair parts are required to meet your particular stair building problem.

A SERIES OF BEAUTIFUL STAIRWAYS ... Styled for TODAY'S HOMES

On this and the following pages are shown a few examples of the interesting varieties of stairways possible to produce with Morgan Stair Parts.

A stairway to be well designed must consist of graceful, well proportioned, perfectly matched parts made of smoothly finished enduring woods. Such a stairway reflects the good taste of its owner and is a source of lasting joy.

Around the stairway the whole scheme of interior finish and decoration is usually developed. A beautiful stairway encourages a beautiful interior. Understanding this, one can readily appreciate the importance of carefully considering every factor that enters into sound stair building, both from the standpoint of serviceability and lasting design.

FOR COMPLETE DETAILS OF MORGAN STAIR PARTS SEE PAGES 130 AND 131

M-760

STAIRWAYS OF CHARM

Easy on the Eye . . . Easy to Ascend!

The keystone of an interior in rare good taste is a stairway of staunch simplicity and graceful sweep. Such a lovely stairway is yours today! You can have all of the advantages of correct design, accessibility and durability in the stairway for your home by selecting Morgan pre-

cision made, stock stairwork — and the cost will be well within the bounds of your budget.

M-760 Stairway is of Regency design and includes: M-764 Starting Newel — M-726 Easement — M-742 Gooseneck, 2 risers — M-756 Angle Newel — M-720 Rail (2 1/4" x 2 3/8") — M-777 Balusters — M-784 Brackets.

Three generations of leadership in Stairwork Designing and Manufacturing experience is the background of MORGAN Stairparts and is your guide to correct stair building.

Leading architects and stair builders for over 90 years have used Morgan Stairwork with complete satisfaction.

FOR COMPLETE DETAILS OF MORGAN STAIR PARTS SEE PAGES 130 AND 131

MORGAN *Authentic* STAIRWORK

MORGAN STAIRWAYS

M-851

The GUILFORD STAIRWAY

A very beautiful Georgian Stairway reproduced from an original in an old eighteenth century home in Baltimore, Maryland. The reeded Starting Newel capped with an urn of graceful scale is truly a work of art.

The suggested Section of Stairway shown above includes:

M-720 Rail ($2\frac{1}{4}'' \times 2\frac{3}{8}''$)—M-726 Easement—M-731 Gooseneck 2 Riser—M-896 Starting Step—M-884 Starting Newel—M-892 Balusters—M-891 Landing Newel.

M-859

The NEWBURYPORT STAIRWAY

A simple and very charming reproduction of New England origin embracing balance, strength and beauty; all the result of most skillful designing.

The suggested Starting Section shown above includes:

M-720 Rail ($2\frac{1}{4}'' \times 2\frac{3}{8}''$)—M-769 Starting Newel—M-777 Balusters—M-882 Brackets.

All parts furnished in Natural Birch except Treads and Risers.

Your stair builder will tell you exactly what Morgan stair parts are required to meet your particular stair building problem.

FOR COMPLETE DETAILS OF MORGAN STAIR PARTS SEE PAGES 130 AND 131

MORGAN *Authentic* STAIRWORK

MORGAN STAIRWAYS

M-857

M-858

The EASTERN POINT STAIRWAY

You will never tire of the simple beauty of this lovely Morgan Colonial Stairway. It is very pleasing to look at from any angle.

The suggested Starting Section shown above includes:

M-720 Rail ($2\frac{1}{4}'' \times 2\frac{3}{8}''$)—M-779T Starting Step—M-895 Starting Newel—M-724 Turnout Easement—M-892 Balusters.

The ANNAPOLIS STAIRWAY

From the State Capitol Building at Annapolis, Maryland, comes the inspiration for this unusually fine adaptation.

The suggested Starting Section shown above includes:

M-720 Rail ($2\frac{1}{4}'' \times 2\frac{3}{8}''$)—M-766A Starting Newel—M-725 Easement with Newel Cap—M-894 Balusters—M-882 Brackets.

Your stair builder will tell you exactly what Morgan stair parts are required to meet your particular stair building problem.

All parts furnished in Natural Birch except Treads and Risers.

FOR COMPLETE DETAILS OF MORGAN STAIR PARTS SEE PAGES 130 AND 131

MORGAN *Authentic* STAIRWORK

MORGAN STAIRWAYS

M-762

The ANDOVER STAIRWAY

A most attractive new stairway created by Morgan Designers. Adapted for use in modern as well as traditional homes.

The suggested Starting Section shown above includes:

M-720 Rail ($2\frac{1}{4}'' \times 2\frac{3}{8}''$)—M-751 Starting Rail Drop—M-896 Starting Step—M-754 Starting Newel—M-777 Balusters—M-882 Brackets.

M-761

The VICTORIA STAIRWAY

For TO-DAY'S home! . . . Modern in design yet admirably suited for use in both traditional and modern homes.

The suggested Starting Section shown above includes:

M-720 Rail ($2\frac{1}{4}'' \times 2\frac{3}{8}''$)—M-750 Vertical Volute—M-753 Starting Newel—M-892 Balusters—M-882 Brackets.

All parts furnished in Natural Birch except Treads and Risers.

Your stair builder will tell you exactly what Morgan stair parts are required to meet your particular stair building problem.

FOR COMPLETE DETAILS OF MORGAN STAIR PARTS SEE PAGES 130 AND 131

MORGAN *Authentic* STAIRWORK

MORGAN STAIRWAYS

M-763

M-853

The STANTON STAIRWAY

A gracefully designed stairway that will add much to the beauty of any home.

The suggested Starting Section shown above includes:

M-720 Rail ($2\frac{1}{4}'' \times 2\frac{3}{8}''$)—M-752 Starting Rail Drop—M-754 Starting Newel—M-894 Balusters—M-896 Starting Step—M-882 Brackets.

All parts furnished in Natural Birch except Treads and Risers.

The STEIGEL STAIRWAY

Some of the best of the old original Colonial Stairways were very plain—free from ornate detail and it is these plainer types that are most suited to present-day home building. An example of this simplicity of detail is shown above. This interesting design comes from an old Dutch Colonial house in Lancaster County, Pennsylvania.

The suggested Starting Section shown above includes:

M-896 Starting Step—M-885 Starting Newel—M-890 Landing Newel—M-720 Rail ($2\frac{1}{4}'' \times 2\frac{3}{8}''$)—S4S $1\frac{1}{8}''$ Balusters.

Your stair builder will tell you exactly what Morgan stair parts are required to meet your particular stair building problem.

FOR COMPLETE DETAILS OF MORGAN STAIR PARTS SEE PAGES 130 AND 131

M-856A

M-853A

The COMBINATION OPEN *and* CLOSED STAIRWAY..... STYLED *by* MORGAN

Here are three excellent examples of combined closed and open stairways. The M-720 Rail in M-856A and M-859A Stairways dies in Rosette M-905A while in Stairway M-853A half Newel terminates the run. Note variations in Starting Steps, Starting Newels and Balusters.

M-859A

M-859A Stairway includes: M-769 Starting Newel—M-894 Balusters—M-720 Rail ($2\frac{1}{4}'' \times 2\frac{3}{8}''$)—M-905A Rosette.

M-856A Stairway includes: M-779V Starting Step—M-765 Starting Newel—M-722 Volute—M-720 Rail ($2\frac{1}{4}'' \times 2\frac{3}{8}''$)—M-777 Balusters—M-905A Rosette.

M-853A Stairway includes: M-896 Starting Step—M-885 Starting Newel—M-890 Landing Newel—S4S $1\frac{1}{8}''$ Balusters—M-720 Rail ($2\frac{1}{4}'' \times 2\frac{3}{8}''$)

EARLY AMERICAN STAIRWAYS

This Robust Yet Richly Decorative Type of Early American Stairway is Becoming Increasingly Popular in Present-Day Homes of Early American Tradition.

STAIRWAY M-921

The DEERFIELD STAIRWAY

The irresistible mellowness and charm present in this old Early American Stairway of English "extraction" lies in its chaste simplicity and rugged strength. For years this Stairway has been a very popular item in the Morgan line.

The suggested Starting Sections shown above and to the right include:

- No. 25 Starting Step, see page 137
- M-931 Starting Newel, $3\frac{1}{2} \times 3\frac{1}{2} \times 5-2$
- M-936 Angle Newel, $3\frac{1}{2} \times 3\frac{1}{2} \times 5-9$
- M-936A Angle Newel, $3\frac{1}{2} \times 3\frac{1}{2} \times 5-4$
- M-942 Rail, $3\frac{5}{8} \times 1\frac{3}{4}$
- M-943 Stair Shoe, $3\frac{1}{2} \times 1\frac{1}{2}$
- M-945 Fillet, $\frac{7}{8} \times 2$

THE "HENRY SLEEPER" MANTEL

A Historical Mantel Adaptation

Originals of this very attractive mantel may be found in many of the stately old Georgian Homes in England. In America, too, are to be found Eighteenth Century copies of this distinguished design. It is admirably suited to today's interiors that are traditional in character as well as interiors of contemporary design.

M-1449 No. 1 PINE. Length of Shelf 5'-4 $\frac{7}{8}$ ". Width of Shelf 5 $\frac{3}{4}$ ". Width of Breast 5'-4". Height overall 4'-5 $\frac{1}{2}$ ". Inside Measurement 4'-4" x 3'-3". Set-up, one to a crate.

PRICE \$46.89

M-1450—M-1450A

A GEORGIAN MANTEL from the Old Dominion State

Typical of Design Used in Mount Vernon and Williamsburg

In many of the historic homes of old Virginia one may see the original detail of this charming Georgian Mantel. This design is an exact duplicate of a Mantel in the Shirley House, James River, Virginia. It is indeed a cheerful homelike design that will brighten any interior. Furnished in two sizes.

M-1450 No. 1 PINE. Length of Shelf 6'-5". Width of Shelf 6 1/2". Width of Breast 5'-8". Height 4'-4 1/8". Inside measurement 4'-2" x 3'-0". Set-up, one to a crate.

PRICE \$48.40

M-1450A No. 1 PINE. Length of Shelf 5'-11". Width of Shelf 8". Width of Breast 5'-2". Height 4'-4 1/8". Inside measurement 3'-8" x 3'-0". Set-up, one to a crate.

PRICE \$49.55

"STRAWBERRY HILL" FIREPLACE SURROUND—M-1451A, M-1451

Particularly Adapted for Use in Early American Interiors

The Surround shown above and below is an exact reproduction of a design discovered in Virginia during the restoration of an old plantation home.

M-1451A SURROUND (2" x 6"). For large fireplace opening, such as above. Surround is furnished in two 5' pieces mitred one end and one 10' piece mitred one end with two base blocks to the opening. K-D, easy to mitre for any opening. One to a crate. \$34.58

M-1451 SURROUND (2" x 6"). For smaller fireplace opening, such as shown to the right. Surround is furnished in two 3'-6" pieces mitred one end and one piece 7'-0" mitred one end and two base blocks to the opening. K-D. Easy to mitre for any opening. One to a crate. \$25.47.

Fireplace Surround M-1451

M-1452—M-1452A

MANTEL OF THE WAYSIDE INN, Sudbury, Massachusetts

An Adaptation in Two Sizes

After the mantel in the Ball Room of Wayside Inn, Sudbury, Massachusetts, this Mantel has been adapted. All of the beauty of the original has been preserved to enhance the beauty of present-day home interiors. Furnished in two sizes.

M-1452 No. 1 PINE. Length of Shelf 4'-11 3/4". Width of Shelf 5 3/4". Width of Breast 4'-9 3/4". Height 3'-7 3/4". Inside measurement 3'-7 3/4" x 2'-6 3/4". Set-up, one to a crate.

PRICE \$37.35

M-1452A No. 1 PINE. Length of Shelf 5'-10 1/8". Width of Shelf 6 3/4". Width of Breast 5'-8". Height 4'-5 1/2". Inside measurement 4'-2" x 3'-0". Set-up, one to a crate.

PRICE \$49.00

M-1453—M-1453A

The ROCKPORT MANTEL

An Adaptation in Two Sizes

The pleasing ornamentation used on this lovely Mantel will satisfy the tastes of many who lean to the more decorative in the Colonial. Certainly a most distinguished design. Furnished in two sizes.

M-1453 No. 1 PINE. Length of Shelf 4'-11 $\frac{3}{4}$ ". Width of Shelf 5 $\frac{3}{4}$ ". Width of Breast 4'-9 $\frac{3}{4}$ ". Height 3'-7 $\frac{3}{4}$ ". Inside measurement 3'-7 $\frac{3}{4}$ "x2'-6 $\frac{3}{4}$ ". Set-up, one to a crate.

PRICE \$43.70

M-1453A No. 1 PINE. Length of Shelf 5'-10 $\frac{1}{8}$ ". Width of Shelf 6 $\frac{3}{4}$ ". Width of Breast 5'-8". Height 4'-5 $\frac{1}{2}$ ". Inside measurement 4'-2"x3'-0". Set-up, one to a crate.

PRICE \$55.73

M-1455

The DEDHAM MANTEL from Massachusetts

In Dedham, Massachusetts, the original of this Mantel has graced the dining room of an old home for generations.

It is the embodiment of Colonial architectural artistry and a happy part of the modern Colonial home that will uphold the high name of its ancestry.

M-1455 No. 1 PINE. Length of Shelf 5'-11". Width of Shelf 7 1/8". Width of Breast 5'-0". Height 4'-5 1/4". Inside measurement 4'-0" x 3'-1". Set-up, one to a crate.

PRICE \$47.77

M-1456

The PEABODY MANTEL

The Manifestation of Superb Colonial Architecture—a True Copy

A classic gem of the late eighteenth century. Richly ornamented, yet most dignified. The delicate reeding on the breast and on the convex sides is typical of the period when the original of this Mantel brightened the New England home in which it was used.

M-1456 No. 1 PINE. Length of Shelf 5'-11". Width of Shelf 7 1/8". Width of Breast 5'-0". Height 4'-5 1/4". Inside measurement 4'-0" x 3'-1". Set up, one to a crate.

PRICE \$64.67

M-1457

The ASHER BENJAMIN MANTEL

An early nineteenth century Mantel of Empire influence. The Sunburst motif and moulded panels are helpful embellishments that give balance and good design to the Mantel breast. This design is attributed to Asher Benjamin, prominent Architect of the early 1800's.

M-1457 No. 1 PINE. Length of Shelf 5'-11". Width of Shelf 7 1/8". Width of Breast 5'-0". Height 4'-5 1/4". Inside measurement 4'-0" x 3'-1". Set-up, one to a crate.

PRICE \$54.83

Interior Showing Mantel M-1457

M-1458—M-1458A—M-1458B

The "BULFINCH" GEORGIAN MANTEL

Original in the American Wing of the Metropolitan Museum, New York City

The striking beauty of this authentic Georgian Mantel is in its delicate fluting and fine dentil moulding beneath the gracefully detailed shelf. An outstanding example of eighteenth century design.

M-1458 No. 1 PINE. Length of Shelf 5'-8 $\frac{3}{4}$ ". Width of Shelf 5 $\frac{7}{8}$ ". Width of Breast 5'-0 $\frac{1}{2}$ ". Height 4'-2 $\frac{1}{2}$ ". Inside measurement 3'-8" x 2'-9". Set-up, one to a crate.

PRICE \$68.83

M-1458A No. 1 PINE. Length of Shelf 6'-4 $\frac{3}{4}$ ". Width of Shelf 5 $\frac{7}{8}$ ". Width of Breast 5'-8 $\frac{1}{2}$ ". Height 4'-8 $\frac{1}{2}$ ". Inside measurement 4'-4" x 3'-3". Set-up, one to a crate.

PRICE \$77.76

CHINA CASES M-1553—M-1553-A

Reminiscent of the early Colonial Days is this China Case of intimacy and charm—and why not? It can boast an ancestry as proud as any. The original was used in Barnaby Manor—1680-1710—located in Prince George County, Maryland.

M-1553 No. 1 PINE. Overall height 8'-13/4\", inside size of main body 2'-5 1/2\"/>

M-1553A Same as M-1553 except 6 light sash instead of 8 light and 2 shelves in upper section. Overall height 7'-4\", inside of main body 5'-11 1/2\"/>

M-1553A

CHINA CASES

No. 1 PINE

Hardware Not Included

The size of this China Case is exactly the same as M-1553, the difference being that the drawer under the counter shelf has been eliminated and the lower doors made higher to take up this space.

M-1554 No. 1 PINE, Overall height 8'-1 $\frac{3}{4}$ ", inside size of main body 2'-5 $\frac{1}{2}$ " x 6'-9 $\frac{1}{4}$ " x 1'-2" deep. Upper doors glazed with clear glass, with wood beads. Semi K-D.

PRICE \$99.77

For M-1554 and M-1557

The details of China Case M-1557 are much the same as those of M-1553. A pair of upper doors of different style and a different type of head make the variation. The drawer is retained and the lower doors are the same. The popularity of this design proves it has appeal to people who want to exercise their taste for something better.

M-1557 No. 1 PINE, Overall height 8'-1", inside size of main body 2'-5 $\frac{1}{2}$ " x 6'-9 $\frac{1}{4}$ " x 1'-2" deep. Upper doors glazed with clear glass, with wood beads. Semi K-D.

Typical Planned Work Centers

THESE EFFICIENT, STEP-SAVING COMBINATIONS ARE SIMPLE TO
CREATE WITH MORGAN SECTIONAL CABINETS

Homemakers demand a modern kitchen of new exciting design and one that is efficient in every respect! The advantages of such a kitchen are obvious.

As the keystone of a truly modern kitchen, we offer Morgan Kitchen Cabinets.

Such a kitchen releases the fortunate homemaker from drudgery, makes cleaning easier, with definite savings in time and steps. Women get better results with less effort in this modernly arranged kitchen in contrast with the daily struggle in the old-fashioned, inefficient kitchen with out-moded equipment.

These new kitchens are the result of intensive research by homemakers, home economists, and engineers searching for the best practical labor-saving arrangement plus new and better equipment to best realize these advantages. It has been generally agreed that a kitchen should be organized into "work centers." Five major centers have been fairly well standardized.

1. Storage and Preparation Center

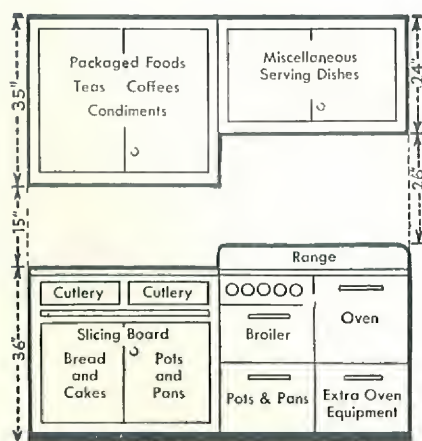

Here should be grouped food storage, including the refrigerator for perishable foods, shelves for canned and packaged goods, special drawers for flour and sugar, and a working surface for food preparation with utensils, mixing-bowls, electric mixer, and baking pans close at hand.

1 Storage and Preparation Center

2. Cooking and Serving Center

Here will be found the range and an adjacent working surface, with wall cabinets for the storage of serving dishes and glassware; also base cabinets for utensils used at the range.

2 Cooking and Serving Center

3. Cleaning and Dishwashing Center

Here the center is dominated by the sink. An electric dishwasher may be permanently installed either adjacent to it or as an integral part of the sink base. The base cabinet provides for cleaning materials, garbage container, and a drawer for dish towels.

3 Cleaning & Dish-Washing Center

4. Utility Storage Center

This is comprised of at least a tall storage cabinet to store aprons, a broom, vacuum cleaner, wax polisher, together with shelves for linens, additional appliances and cleaning materials.

4 Utility Storage Center

5 Planning Center

5. Planning Center

A desk at convenient height with a comfortable chair, extension telephone and a shelf or drawers for cook-books, grocery lists, and odds and ends, is an important time-saver for the busy homemaker.

The 4 Basic Kitchen Layouts

REGARDLESS OF YOUR FAMILY NEEDS MORGAN STOCK KITCHEN CABINETS WILL PRODUCE JUST THE IDEAL "MADE-TO-ORDER" ARRANGEMENT YOU REQUIRE

Basically there are four types of kitchens—U-Type, L-Type, Corridor Type and Sidewall or the one-wall Type. Typical examples of these are shown to the right. Although layouts and sizes vary, and the position of the doors, windows and radiators vary, the kitchen nevertheless is of one of these basic types.

For maximum efficiency and ease of movement from one work center to the other, it is good planning to adopt as closely as possible one of these basic plans, taking advantage of all available space. The layouts shown on this page are planned for the utmost convenience. They are practical and incorporate every facility to make them well organized kitchens.

Regardless of the type or size of your kitchen, you may be sure Morgan Kitchen Cabinets will meet your every requirement. Morgan Cabinets are designed by leading kitchen research designers and harmonize with the latest in refrigerators, ranges and other kitchen equipment.

U-TYPE KITCHEN

A most efficient, compact arrangement. Everything is close at hand. Note order of work areas: refrigerator at service door where it should be, then follow the food preparation center and range close to dining room. Space between parallel work surfaces should be at least four feet.

L-TYPE KITCHEN

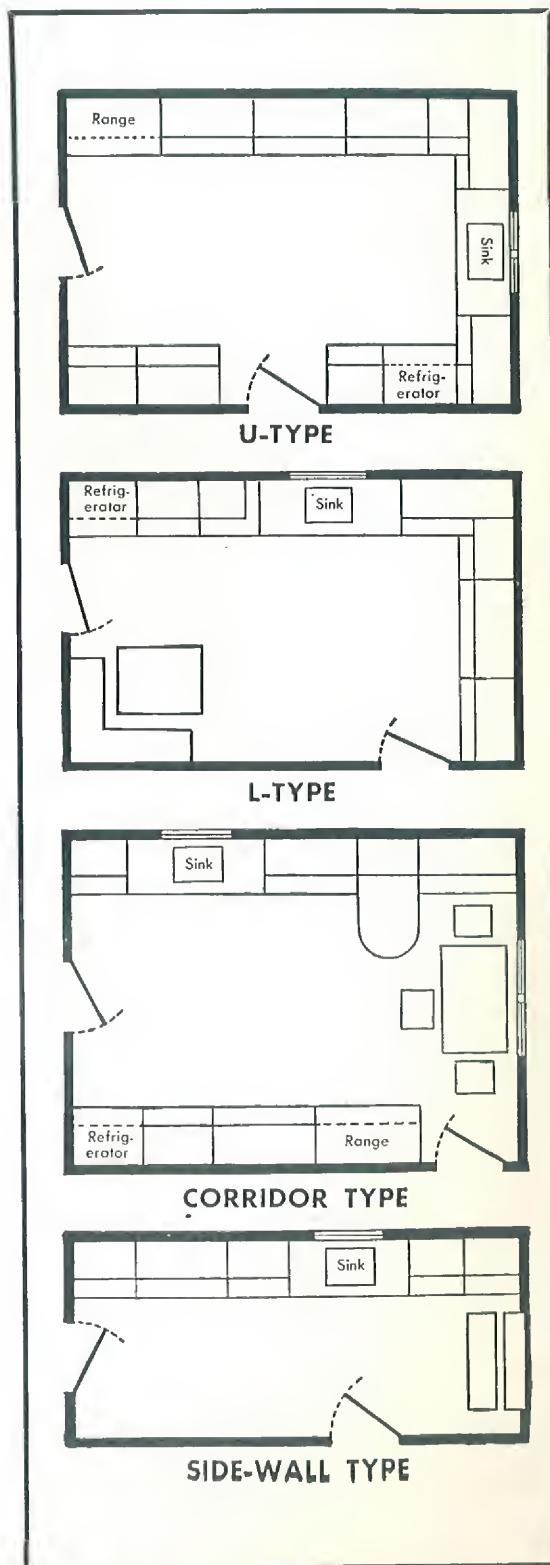

This plan is used where two adjoining walls are available for cabinets and other kitchen equipment leaving other walls for door and window openings. This plan provides for a nook or luncheon bar.

CORRIDOR-TYPE KITCHEN

Here cabinets and appliances are placed along two parallel walls with sink usually on one side and the refrigerator and range on the other.

SIDEWALL-TYPE KITCHEN

Used generally in small homes. All work centers on one wall in their proper order—"Storage," "Preparation," "Cooking" and "Serving."

SUPERIOR QUALITY—STANDARD MORGAN CONSTRUCTION and WORKMANSHIP—

15. Front Frame $\frac{3}{4}$ " thick, grooved to receive Tongued Ends.

MEASUREMENTS OF MORGAN KITCHEN CABINETS

POINTS OF SUPERIORITY IN MORGAN CABINETS

Planned by noted architectural and domestic science authorities. The men engaged to design Morgan Period Woodwork also designed Morgan Kitchen Cabinets.

Scientifically conceived to render greatest efficiency in kitchen layout—time-saving—toll-saving!

Fit any space—meet any requirement. Hundreds of practical assemblies may easily and quickly be produced with Morgan Kitchen Cabinet units.

Strictly modern in design—exposed surfaces are all flat, dust-proof, sanitary, easy to keep clean. Morgan Cabinets harmonize with all of the latest modern designs, ranges, refrigerators and other kitchen utilities.

DOORS

Doors are full $\frac{3}{4}$ " thick, 5 ply with Basswood veneer faces and are guaranteed not to warp, twist or buckle. Doors and drawers have lip fronts providing added security against dust and vermin.

Morgan doors are very light and easy on hinges. They will not sag. The beveled rabbet on Morgan doors will prevent binding.

Morgan cross banding on doors makes smooth exposed edges. Morgan face veneers are Basswood giving a smooth satiny appearance and providing a perfect painting surface.

DRAWERS

Morgan drawers have $\frac{3}{4}$ " sliding frame under the drawer with guides on each side nailed into the side of the body so that they will have easy action at all times. Drawer Slide Frame is put together at factory.

HARDWARE

Special, improved tarnish proof Chromium hardware furnished for exterior, and Cadmium plated parts for interior of cabinets.

Morgan drawer pull is neat and attractive. Screws will not loosen as they are fastened through the drawer from the back. Morgan door knobs are sturdier, more attractive, and more solid as attached to the door from the back.

BODY OF CABINET

Made of No. 1 Pine ready for painting. Substantially constructed.

The face rim in Morgan Kitchen Cabinet base units is $1\frac{1}{2}$ " on sides and bottom with a 2" top rail. Face rim of upper units $1\frac{1}{2}$ " all around.

Morgan front frame is mortised and tenoned and glued together, whereas the frame in many cabinets is nailed only. Morgan front frame is grooved so that the end pieces that are tongued fit together perfectly.

Working heights are full 36" including counter—the most convenient height for the average housewife. Eliminates tiresome stooping.

Space arrangements in all Morgan Cabinets were worked out by domestic science authorities and consequently assure minimum waste of motion and time. Utensils are always where they should be—always within easy reach and never in the way.

Morgan Kitchen Cabinets are made so regular stock sinks and drainboards of porcelain, tile, Monel Metal, Stainless Steel, Bakelite, Formica or plain wood fit perfectly. Note: Your dealer can furnish any type of sink or counter top desired.

Furnished unpainted to enable the painter to finish cabinets to harmonize with the color scheme of the kitchen. Already painted cabinets often clash with other colors in the kitchen.

Continuous toe space at base of cabinets is provided for working comfort and to keep front of base free from mop stains. (No legs to catch dust.) Metal bread and cake drawers and flour container of special heavy sheet tin. Metal flour bins are of AAA charcoal tin.

Morgan Kitchen Cabinets can be easily and quickly put together. All pieces are clearly marked so that "A" fits into "A"; "B" into "B", etc. Furthermore, each carton contains full direction sheets.

Glass	93	Woodlife	48

GOOD WOODWORK DESERVES GOOD TREATMENT

ANDERSEN-IROQUOIS-MORGAN MILLWORK PRODUCTS have been made to high quality standards, warehoused under protective conditions and delivered carefully to insure the user of his full dollar value.

By practicing a few simple precautions, a lifetime of satisfaction can be enjoyed from the use of these products.

1. Never store woodwork in damp places; wait until the plaster and cellar walls are dry.
2. Paint or varnish immediately after fitting, including the top and bottom edges of doors.
3. Overlap the paint on the glass to seal the joint between the putty and the glass.
4. Do not weaken doors by cutting away the dowels, or cutting down to make a smaller size.
5. Use three hinges to each door and set flush with the edge; be sure to hang plumb.

Why **WOOD** *Window Units*

20 REASONS

1. **BEAUTY**—the many styles of wood windows enable you to have correct architectural beauty and design for your home—easily and at low cost.
2. **WEATHER-TIGHTNESS** — precision-made wood windows and modern weatherstripping are the ideal combination to keep cold, heat and dust out of your home.
3. **REDUCED CONDENSATION** — Wood windows have a natural insulating value—because wood is a non-conductor of heat or cold. Wood window parts discourage the gathering of moisture and condensation, which is often the cause of damage to costly draperies, curtains and inside walls.
4. **DURABILITY**—wood sash do not rust, and remain unaffected after long periods of exposure to such corrosive elements as salt, sea and chemically laden air.
5. **RESIST STICKING**—all buildings, especially when new, settle slightly, often enough to throw windows out of line and cause sticking. Readjustment of wood windows to operate smoothly again is done quickly and economically.
6. **QUIET**—because wood does not readily transmit sound, wood windows discourage rattling due to vibration.
7. **LONG LIFE**—modern scientific treatments, when applied to wood windows, give them still further resistance to decay, stain, termite attack and swelling caused by moisture.
8. **EASY TO ATTACH FIXTURES**—window fixtures required for venetian blinds, curtains and draperies are readily applied to wood windows with simple household tools.
9. **WIDE SELECTION**—wood windows come in many sizes and designs. These stock design windows are built to fit standard openings—being made of workable material, they are quickly adjusted to fit the opening.
10. **RESIST TEMPERATURE CHANGES**—under changes of temperature, wood windows resist expansion or contraction.
11. **RESIST ACID FUMES**—wood windows are not readily affected by acid fumes and other similar conditions often found in the air.
12. **TAKE ANY FINISH**—wood windows readily take any decorative finish, and can be refinished from time to time. They can be painted, enameled, stained, or natural finished.
13. **HOLD FINISHES LASTINGLY**—well seasoned wood window surfaces form a natural bond for paint and other types of finish.
14. **STORM SASH AND SCREENS READILY FITTED**—standard wood window frames will accommodate wood storm sash and screens without additional framing expense. Storm sash are guaranteed fuel savers.
15. **QUICK, EASY INSTALLATION**—as wood window units can be fitted to the openings after most of the rough construction work has been completed, there is little chance for them to be damaged during construction activities.
16. **SHOCK-ABSORBENT**—wood windows have a shock absorbing quality which minimizes glass breakage as the result of a sudden jar or unusual strain.
17. **EASILY REGLAZED**—wood windows can be reglazed quickly and economically in case of broken lights of glass. The problems of cold weather glazing are lessened when wood sash are used, since wood is a non-conductor of cold.
18. **HEAT RESISTANT**—Because wood does not twist or expand readily under intense heat, breakage of glass in such conditions is lessened.
19. **SIMPLE, EASY REPLACEMENT**—Because wood is a workable material, parts which are accidentally damaged can easily be replaced.
20. **SAFETY**—in case of fire, wood windows still provide a means of exit because they do not twist or buckle, and thus are readily opened.
